Sixteen Whigs certain, 1 Native, five Loco-Focus two not yet fully heard from. We do not give up the Erie District, though Judge Thompson is person ally very strong, and has made friends by openly denouncing in Congress the Harbor Veto and the Tariff of '46. We hope White (for the Tariff of '42) has beaten Wilmot, who cast the only vote (except Dallas) from Pennsylvania for the Tariff of '46 Loco-Focoism is indebted for a good part of the

little that is left it to the oblique aid given it by Nativism in Philadelphia County. But for that both C. J. Ingersell and C. Brown would have been severely beaten by Whigs, and Power's majority would have been at least 5000 greater than it is In nearly every Whig District the majorities are increased, while those of the other side are wofully ent down. In Berks it is less than 1200; so in the Northampton and Westmorels ad Districts. STATE LEGISLATURE COMPLETE - See

County was on Friday selected as the Whig candidate for Senator in the Second District, and has accepted. He is known as an ardent Whig. an able and worthy man, the son of a Revolutionary veteran who was for many years the most prominent and active Whig in the County. We bespeak for him an energetic support in the lower part of at 5% o'clock, where commutation tickets, at the low that slab-sided District where it is impossible that price of Seven Dollars for the whole excursion, will be a candidate from the upper end shall be well known. This is the last of the ungainly Districts: let us be faithful to each other.

The Whigs of CHENANGO Co have nominated WILLIAM CHURCH, of Coventry, for Sheriff; RANSOM BALCON, of Oxford, and DAVID McWHOR-TER, of Pitcher, for the Assembly; and Dr. BLIS HARRIS, of Norwich, RUSSELL CASE, of Smyrna, and JAMES HUGHSTON, of Guilford, for Coroners. If there is any of the old spirit of 1837 to '40 left in the Herald of Freedom, an Anti-Slavery journal, and Chenango, that ticket will be elected throughout. removed to Concord. The report of Mr. Secretary Walker as to the result of his financial journey was also a subject of loan for the present and to send out a new issue of Treasury Notes bearing an interest of five percent. According to the decision of a former council the preparations for an attack on Tampico have been going forward steadily. They were so far completed by the end of the last month, that the vesnation. The steamer Mississippi, which had completed her cargo of the necessary stores and supdies of munitions, sailed on the 30th ult. She probably reached the squadron about the 5th inst and it is presumed that every thing was ready for an attack in three or four days afterward. We are therefore in daily expectation of receiving infor-mation of the result,—the distance from Vera Cruz to Tampico being about a hundred miles. It is to be expected that Tampico will be taken, and then a passage will be opened into the interior, by which remiorcements and stores may be readily transporremorcements and stores may be readily transpor-ted to our troops as they advance toward. I think it will not be less than that, and may be more. But at all events we have elected CHESTER BULLER to Congress by a tremendout of the Central Corners by a tremendout of the Pariff of 4c. From the best calculations we can make Power will have a majority of 200 in the County for Canal Commissioner, and we shall probably elect one Representative.

P. S. We have just received news from Willer Power and when these shall be fully groused, where can the authors of these calculations of public indignation? Riper and wiser nations of public indignation? The belliglamities hide themselves from the bursting storms of public indignation? Riper and wiser nations are abandoning appeals to the sword. The bellig-erent spirit qualis before the advancing power of reason and Christian philanthropy. Let us hoast less loudly of our intelligence while we are still lingering among the vices of barbaric ages.

He is no doubt disappointed to find that he is less necessary to the net. His time is approaching, however, and unless he finds t convenient to pass a few months in the United States at Gen. On this point it is understood that but the condition of Mexico is such, in my opinion. a decision was made to abandon every idea of a as to render the central plan productive of the most good to the country at large. Every State now styles itself "Free and Sovereign," and I presume they conceive the title to belong to them! But they are far, very far from being free, and almost equally short of sovereignty. It is preposterous to suppose that freedom can exist where the mind is bound. paper, shows the spirit with which our act alread are met:

"Confirm me in the perpetual possession of the property of which I have robbed you, and give me a favorable opportunity to rob you of more.

"Such is the true reading of the proposal of peace which the President of the Anglo-American United States has made to Mexico. Such a proposal from one of the volunteers which follow Taylor, anxious to dill his pockets in any fashion, would have excited no surprise; but that the Chief of a civilized nation should give such a proof of immorality, is a matter of shame and alarm to all who have any thing to lose. It is plain that this step, shameful as it is in any light has been prompted by the fact that our enemies are unable to bear the immense costs of the war, and the knowledge that within four months from this time their troops and their squad-

mense costs of the war, and the knowledge that within four months from this time their troops and their squadrons will perish with hunger, or the inhabitants of Philadelphia, New York, &c. will be ruined by the new contributions, and severe imposts, which the said President some time since asked authority to lay upon them.

We are therefore firmly persuaded that with sufficient constancy to suffer a little longer the crils which arise from a state of war, these illusions of power will be early dissipated, and that the proposal of peace which is now clothed in terms of bitter provocation, will be, in the course of a few months, repeated in decent and just language. While all this is proceeding, and the general Congress shall be discussing the matter, it is desirable that the public writers, and persons well informed upon extra national subjects should exert themselves to illustrate this grave question, and thus facilitate Legislative action.

Avoil 1, 1 o'clock, A. M. Sept. 14, 1846.

Sin.—I have received your favor of this date, acknowledging a decree issued by the Supreme Government of the nation, embracing a programme of the proceedings adopted to regulate a due celebration of the proceedings adopted to regulate a due celebration of the recistablishment of the Constitution of 1824, the assumption by myself of the supreme Executive power, and the anniversary of the giorious cry of Dolores.

My smitsfaction is extreme to observe the embusiasm with which preparations are made to celebrate the two great blessings which have fallen upon this nation—her independence and her liberty—and I am peneirated with the deepest gratitude to find that my arrival at the Capital will be made to contribute to the assignment of this object I shall make my entry in that city to-morrow at midday, and desire, in contributing my share to the mational jubilee, to observe such a course of the people.

I am resolved that they shall not be falsified, for in their redemption I behold the general good, as well as my honor as a Mexican and a soldier. I cannot abandon this position. The existing Government has pursued a course with which the nation has shown itself cottent, and I have no desire to subvert it by taking its place. I feel abundant pleasure in remaining where I am, and falter myself that the nation will applaid my choice. The Judiciany of New York—In a few days our people will be called upon to decide whether our present Judiciary shall be abrogated or not.

It is perhaps the most important question ever submitted to them. It is one that will involve the rights of person and property for twenty years to come.

We have read with much attention and interest, a work published by Gould, Banks & Co. No. 144 Nassaust. New York. This work is entitled Lubi's Practice and Pleadings in Equity. In our judgement it is a first rate work, and examines the subject of reform in our Judiciary, so far as it relates to our Equity Courts, with great fairness and candor.
